PROFESSIONAL SUMMARY

AI-focused Software Engineer building production RAG and agentic systems, with full-stack backend ownership – cut incident triage from hours to minutes, substantially raised RAG response accuracy for a government client, and shipped the backend infrastructure (multi-tenant billing, data integrity) those systems run on.

TECHNICAL SKILLS

Generative AI: RAG (Hybrid Retrieval), LlamaIndex, AI Agents, MCP, Anthropic API (Claude), OpenRouter, LLM-as-Judge Evaluation, pgvector, vLLM (Llama 3, Gemma prototype), Langfuse / OpenTelemetry

Backend: Python, TypeScript, Django (DRF), FastAPI, REST APIs, PostgreSQL (materialized views), Redis, Supabase, Zitadel Auth

Reliability & Security: HMAC-SHA256 Webhook Verification, Multi-Tenant Data Isolation

Cloud/DevOps: GCP, Vertex AI, Cloudflare Workers AI, CI/CD

WORK EXPERIENCE

Software Engineer - AI

ConnectSecure

Jul 2025 – Present

- **AI Support & Remediation Agent:** Cut incident triage from hours (manual analyst process) to minutes by building an autonomous agent with weighted hybrid retrieval and a Grafana MCP server for log querying. Evaluated via double-blind LLM-as-judge, with semantic caching to keep token costs low. *Tech:* pgvector, HNSW, MCP, Grafana Loki, Tesseract OCR, Redis, Cloudflare Workers AI, Langfuse, OpenTelemetry.
- **Government Client RAG Platform:** Substantially raised response accuracy and cut LLM token usage by leading design/deployment of an enterprise RAG assistant on GCP with multimodal ingestion, resolving timezone/calendar edge cases; served quantized Llama 3 via vLLM in production, with a Gemma prototype evaluated alongside. Separately, built a Claude Code coding harness automating microservice deployment from natural-language prompts. *Tech:* pgvector IVFFlat, RRF reranking, Vertex AI, vLLM, Anthropic API, OpenRouter.
- **ConnectSecure Agent Log Analyzer:** Built a log analysis platform, adopted by both the support and agent development teams to debug endpoint and agent issues, correlating findings across five log sources (agent, software, patch, network scan, agent monitor) with rule-based High/Medium/Low severity detection and evidence preservation, cross-log event correlation, and chronological timeline reconstruction; an integrated AI assistant provides root-cause analysis and remediation guidance. *Tech:* TypeScript.
- **Tenant & Partner Billing Portal:** Prevented revenue leakage and cut dashboard API latency via a transactional Supabase/Django sync pipeline and PostgreSQL materialized views; enforced multi-tenant isolation via Zitadel JWT-scoped queriesets and HMAC-SHA256 webhook verification, with GitHub Actions CI/CD for automated testing. *Tech:* Django REST Framework, Supabase, PostgreSQL, Zitadel, HMAC-SHA256, GitHub Actions.

AI Intern

ConnectSecure

Jan 2025 – Jun 2025

- *Healthcare Client – Journal RAG:* Built a hybrid-search RAG system with a FastAPI backend over clinical PDFs to improve clinician question-answering. *Tech:* Python, FastAPI, JavaScript.

Research Intern

CDSAML-CCBD, PES University

Jun 2023 – Sep 2023

- Curated a dataset of 11,800 images/364 videos (52,568 instances) and fine-tuned **YOLO** for pothole detection, achieving **85.6% mAP@50, 84.9% precision, 81.0% recall, 82.9% F1-score** on external evaluation data; integrated **MiDaS** depth estimation. *Tech:* Python.

PUBLICATIONS

Pothole Detection (ACN'23): Built dataset and combined **YOLO/EfficientDet** for detection. [Link](#)

Enhancing LLM with CA Knowledge (IEEE ICASET 2025): Implemented **RAG** on **Llama2** using **LlamaIndex** with CA Foundation textbook for specialized QA. [Link](#)

CERTIFICATIONS

Claude Code in Action

Anthropic Academy

Certificate

EDUCATION

PES University, Bangalore, India

Dec 2021 – Aug 2025

B.Tech in Computer Science, CGPA: 9.08

- Awarded 6 academic scholarships (MRD, CNR Rao, DAC) for outstanding academic performance.
- Event Lead, AI Coding Club; designed and built smart miner helmet (ESP32/Firebase).
